• **Your Career name**

- is a good name would help to increase your weak element. This is especially so for newborn child, as your name is frequently used during your school days. For adults, it is best to rely on other areas if you are not able to change your name.
- **Water (40%)** is your most unfavourable element. As you have too much of **Water**, it is best to avoid having too much more
- **Earth (31%)** is your most unfavourable element
- **Metal (9%)** is your least unfavourable element

You have a very unbalanced Five Element distribution. Often, this produces signs of a person with several possible health problems.

You have 9% Metal element. This often signifies possible health related problems to the Lung.

The ideal balance of each element is generally 20% of each element. It is difficult to achieve exactly 20% of each element. This is because it is difficult to know exactly how much of each element you have at any point in time, as long as you have more of your favourable elements, you will improve your balance and harmony.

Your Luck period also changes every 10 years. 5 years, 1 year, 6 months, 1 month, day and hour depending on the element that time period. So you will find that in every period, your luck changes up and down. Thus, you should take advantage of those good luck period for doing any important events in your life.

How do I make use of this information to improve my luck?

Simply make sure to make use of your life falls under your favourable element -

- Such as wearing favourable colours or having room decor colours in your favourable elements. For example, Wood element colours (ie. green/brown). This will ensure that you are not out of sync in your room, your luck will be boosted by your favourable elements.
- Or making sure your career/business industry or job scope falls under your favourable career element. For example, Fire element careers (ie. Marketing, Sales, Fashion). This will ensure that your career/business element will suit you, thus helping you in your career.

The more elements in your favour in different areas of your life, the better your overall luck.

Your Five Element Breakdown

1 Strongest Water	2 Strong Wood	3 Extremely Weak Fire	4 Weakest Earth	5 Weak Metal
46%	12%	9%	31%	0%

This tells me that you are a **Weak Fire** because of too little Fire (9%) and Wood (12%). Your element is born in a season which makes Fire Element Extremely Weak. Thus, influencing the element strength of the other five element elements. The percentage of each element is considered after considering the seasonal strength and the number of that element present.

Thus, your favourable elements are Wood (12%) and Fire (9%) Elements. Metal (9%) is your wealth element. However, as you are a **Weak Fire**, you first need to be stronger in order to control your wealth element. Based on the percentage of the Five Element of each of your favourable element. You should attempt to enhance the favourable element with least percentage, followed by the favourable element with the next lowest percentage.

As **Weak Fire**, your favourable elements are **Wood (12%) / Fire (9%)**

- **Fire (9%)** is your most favourable element
- **Wood (12%)** is your next most favourable element.

Your unfavourable elements are **Water (46%) / Earth (31%) / Metal (9%)**

- **Water (46%)** is your most unfavourable element. As you have too much of **Water**, it is best to avoid having too much more
- **Earth (31%)** is your next unfavourable element
- **Metal (9%)** is your least unfavourable element

You have a very unbalanced Five Element distribution. Often, this produces signs of a person with several possible health problems.

You have 9% Metal element. This often signifies possible health related problems to the Lung.

The ideal balance of each element is generally 20% of each element. It is difficult to achieve exactly 20% of each element. This is because it is difficult to know exactly how much of each element you have at any point in time, as long as you have more of your favourable elements, you will improve your balance and harmony.

Your Ten Deities & Key Characteristics

Analysis Breakdown by Health / Wealth / Career / Business etc

A. Overall

Unfortunately, you are considered a person with very little luck on your side. You have to work extra hard on your own to be able to gain success. You also need to take care of your health, as you have a chart that is likely to have some health issues. But as long as you lead a healthy lifestyle, this should not be a major problem.

B. Health

As you have a slightly unbalanced chart, it does often mean that you do have to take extra caution about your health. This is because most people with too little or too much of an element often shows signs of health issues.

In your case, you have to be extra careful about health issues originating from -

- Lung, due to 0% Metal element

However, as long as you maintain a healthy lifestyle (ie. exercise and taking care of what you eat), you can still minimise any health issues from occurring.

There are many external factors beyond ba zi that will influence your health. Keeping a good diet and following certain exercise helps to keep you healthy.

C. Wealth

You have a total of 2 wealth luck (1 Direct Wealth and 1 Unexpected Wealth). This is considered average wealth luck. Most average people have between 2-4 wealth luck.

Some of the additional earned luck and unexpected wealth unfortunately comes during the age period which you will not benefit too much (ie. during your youth and extreme old age). So it means that you will not enjoy any major wealth luck from such delays during your working age. You will still enjoy some luck every few years or so, but not as significant as having a wealth delay in the major 10-yearly luck.

The only other way you can enjoy additional wealth luck is from people around you, ie. your spouse, your friends or your business partner etc. ie. in business working with a partner that has lots of wealth luck will be beneficial for you, or having a supporting wife with wealth luck will also benefit you etc. This is often what you need to learn business wealth luck from others.

You have a Independence Star. This star will help you if your career/job involves counselling, travelling or religion. Unfortunately, you are a Weak Fire person. Which means that you will not benefit as much from having a career with wealth or power and authority. You are too weak to be able to control your own wealth. Thus, you are more likely to have a career which suits you, rather than trying to constantly strengthen your Weak Fire so as to maintain the necessary balance to benefit from a Wealth/Power / Authority career.

Suitable Career

Wood Element Careers: Cafe, Carpentry, Catering, Distribution, Engineering, Electronics, Filming, Growth, Hospital, New Technology, Paper Plants, Restaurants, Scientific Instruments, Technology, Training, Travel etc.

Fire Element Careers: Chemical process, Fashion, Housewife, Law (prosecution), Livestock, Marketing/sales, Oil, Public Relations, Sales etc.
